

Clean-R

Window Cleaning
Surface Treatment
Pressure Washing

Faster, safer, better facade cleaning:

- <250 pounds fully loaded
- Easily carried by 2 people
- 25 minute setup
- 21 linear fpm cleaning speed

Versatile, effective cleaning methods:

- ARC-knife wiping system leaves perfect finish
- Environmentally benign soap and water
- Modular design; easily swap cleaning tools
- Speed (RPM) not force is used to clean

Our rigging methods ensure a **dependable run** every time

- No invasive anchors, sidewalk shed, or scaffolding; permitting is easy in NYC
- Better aerodynamics, lighter weight, and less forceful cleaning minimizes risk to property
- Mechanically and electronically reactive; cleaning is largely automated after setup

Facade cleaning can be faster, safer, and less expensive;
Clean-R readily integrates with most existing BMU / davit systems

Services

- Routine window cleaning
- Post construction/renovation cleaning
- Surface treatment application
- Pressure washing for masonry
- Rust removal, metal polishing
- Inspected included at no cost (See *Image-R*)

We provide full engineering services for custom needs from design to fabrication to electronics to testing and operation
Multiple U.S. and Overseas patents filed, issued, and pending
